

Peter Jensen, regenerative agroecologist and founder of Terra Firma Permagardens, an ecosystem rehabilitation landscaping business based in Orleans, maintains his lush lawn and terraced “meadowscaped” hillside overlooking Pilgrim Lake in partnership with his wife, Lynn Van Norman. Together they have over 10 decades of hands-on experience across the world teaching organic agriculture, horticulture, and food security with those most directly impacted by climate change. Peter will draw from his university training, experience as an extension agent and hands-on experience in soil science, forest and wildlife ecology and watershed management. Those who attend will be invited to a free guided tour of their property, at a later date to be determined, to see these principles in action.
